**Kourik's Drip-Irrigation Book
Receives Even More Recognition**

In celebration of its 25th anniversary, the *Avant Gardener*, a well-respected gardening newsletter, recognized for providing up-to-the-minute gardening for a quarter of a century, selected its "25 best Books of the Past 25 Years." High on the list, at number seven, was Kourik's *Drip Irrigation for Every Landscape and All Climates*. Published in 1992 by Metamorphic Press, this ground-breaking book has already sold over 25,000 copies.

Even though it's late winter in some parts of the country and spring in a few others, now's a good time to start planning for a drip-irrigation system. In the March 1995 issue of *Organic Gardening*, Rodale Press features Kourik's book, quotes him as "the drip guru".

Remember, drip irrigation is the best way to make any garden flourish, without even considering its water-saving capacities. Drip irrigation is no longer just a survival strategy for drought-stressed Western gardens, but an indispensable tool for wise garden watering throughout America.

FREE OFFER: Your readers, members or customers can receive a free three-page informational fact sheet entitled "**Why Drip Irrigation Always Increases Growth and Yields - Anywhere.**" Adapted from Kourik's drip-irrigation book, this fact sheet helps explain why drip irrigation can increase yields, stimulate more bloom and produce more growth and foliage than any other type of irrigation—even in rainy-summer areas! To get a copy, have your readers, members or customers send an email to rkourik@sonic.net .
